RE: FIX THE WASTE PITS NOW

Dear Mr. Miller,

I am not sure why the EPA is taking such a long time to make its remediation decision about the San Jacinto River Waste Pits. Is our public health not important enough? Are the responsible corporations too powerful? I do not understand why our health is not your top priority.

Please make us, the residents, your top priority and place a permanent cap on the waste pits immediately! It is the most scientifically valid, safest, and quickest option available, and it supported by the Army Corps of Engineers as well as other scientists.

Thank you for your time and for the availability to make my voice heard.

Sincerely,

(b) (6)
